COLOR - GUARD

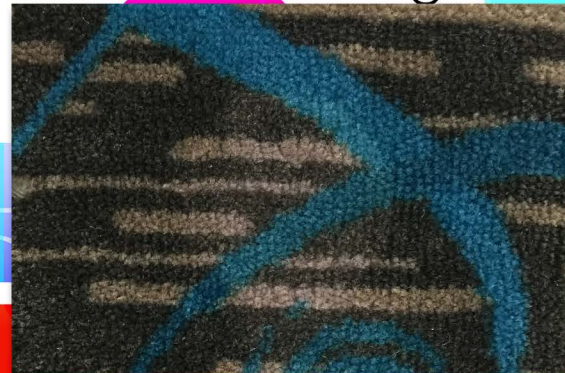

Artisans' process for guarding against color damage from chlorine bleach is uniquely suited for applied pattern carpet. This is part of the dye chemistry not an after treatment, as most mills use. By bonding with the fiber and dye molecules, Color-Guard is durable and results in excellent fastness levels. Color-Guard, combined with the superior wear properties of Artisans' type 6,6 nylon bases, results in a beauty that will last.

Finally you can have the patterns, colors and durability you want in areas normally limited to solution dyed products.

Before : No Colorguard

After: With Colorguard

THE NEWEST INNOVATION IN STAIN PROTECTION TECHNOLOGY

INFINITY penetrates the dye sites of the fibers, then “locked and closed” providing a LIFETIME barrier against spills and soil. Unlike most post topical stain treatments, INFINITY STAIN PROTECTION provides a PERMANENT stain barrier that cannot “wear off” or be “cleaned off” over time. Independent test lab results have proven no stains or spills were evident after immediate clean up. In addition, spills that remained for 24 hours left no visible evidence of staining once cleaned.
